~ DESCRIPTION ~

Romano House is the new business resort of Romano Collection.

Born in the very heart of downtown Catania, where business meets the famous city *movida*, Romano House represent the perfect balance between future and past: the ancient architecture of the 18th century, skilfully restored by the master Andrea Pierotti (well-known for having restored the Red Hall at Cremlino Palace in Moscow), meets the modern, cosmopolitan and essential design of architect Antonio Iraci. The climax of this idea is finally achieved with an harmony in all the areas, empty and full, black and white, skilfully combined by the inspiration and the personal touch of the Romano.

The hotel rises in Catania downtown and has fifty rooms and suites, each of them with a difference in style and personality, all with precious details such as Fendi or Philip Starck furnitures . The central leitmotiv of the combination of styles is clearly visible in each corner and in the design that has been thought like a warm embrace with vaults, stucco and times painted, elements of the ancient history, lost and now recovered.

The idea of *to be* and *to appear* is therefore in perfect balance. Here is then the terrace with the relax and fitness area, a functional place where to meet and find yourself. The meeting room and the break-out rooms , in an intimate and elegant frame, the house bar, meeting point for the city and the hotel Guests, where the beauty finds its proper way.
